TrueX - Enterprise AI Platform

Governed MCP Servers connect your systems to AI. Agents act through them, guided by verified knowledge, with every action evaluated.

Connect

MCP SERVERS

- From Swagger, SQL/DDL, GraphQL, Excel workbooks or templates - or bring your own
- Legacy UIs automated where no API exists
- Catalogued, approved corporate MCP store
- Live in minutes; versioned, with instant rollback

Automate

AGENTS & AGENT TEAMS

- Configured, not coded: instructions, an LLM, permitted connectors
- Any LLM: OpenAI, Anthropic, Google or self-hosted
- Human-in-the-loop approvals and execution guard-rails
- Optional, governed memory for long-running work
- Channels: Teams, Slack, email, WhatsApp and events

Guide

KNOWLEDGE RETRIEVAL

- A specialised MCP Server any agent can call - ours or third-party
- Hybrid retrieval: object hierarchy, vectors and keywords
- Every answer traced to its exact source
- Change a document, change the answer - instantly

Evaluate

CONTINUOUS EVALUATION

- LLM-as-a-Judge for any model or agent, incl. self-hosted
- Built-in or custom criteria; reusable ground truth
- On demand or scheduled, to catch drift and regression
- Deploys in one day on an existing TrueX installation

SECURITY, GOVERNANCE & OPERATIONS

Enterprise-ready from day one.

TENANCY & ARCHITECTURE
Dedicated single-tenant environment per customer. Zero-trust, authorisation built in.

IDENTITY & POLICY
OAuth/SSO, RBAC and Cedar policies on every call. AI chat clients sign in with OAuth 2.1 and dynamic client registration.

AUDIT & ENCRYPTION
Full audit trail of every request. End-to-end encryption.

OBSERVABILITY & COST
Live traffic, latency and errors; tracing from agent to tool. Cost alerts, reporting and limits.

DATA RESIDENCY
[AWS region(s) - to confirm]

OPERATIONS
Managed PaaS on AWS serverless services - we run it. Scales with demand, 24/7.

ACCREDITATION
AWS Qualified Software (FTR) · AWS Validated Software Partner · AWS Public Sector Partner · Cyber Essentials Plus

GUARD-RAILS
Human-in-the-loop approvals and execution guard-rails.

DEPLOYMENT & TESTING
Versioned rollouts, instant rollback. MCP Servers load and pen tested before release.

SERVICE LEVELS
[SLA tiers and support model - to confirm]

Commercials

PAYG on a monthly rolling contract. No upfront licence, no minimum commitment - stop when you don't need it.

Getting started

Working pilot in weeks: connect a first system, automate a key process, measure, then scale.

Talk to us about your first system.
